\$3000

10

7 October from 3pm

THE TELEPATHY PROJECT (Veronica Kent and Sean Peoples)

Special performance event: dream-based artist floor talk

Considering transmission, language and signal across time and space.

Emanations invites us to consider the nature and aesthetics of human and non-human communicative processes. The exhibition presents a diverse range of very different ways through which information, sensation and experience might be transmitted from one mind, agent or entity to another. In each case, a vehicular medium of some form is required to make these processes of transmission possible.
